#### Description

Tripp Lite expands its line of hard drive cables with the introduction of our new line of serial ATA cables. The signal cables connect any high speed Serial ATA device to a Serial ATA controller. Serial ATA delivers two significant benefits: it support much higher data transfer rates (up to 6.0 Gbps...backward compatible to 1.5Gbps) and the narrow cable design helps improve internal air flow. Perfect for the desktop or server that has multiple drives. These cables feature 7-pin right-angle key up/7-pin right-angle key down female connectors and offer easy installation.
