External Active SCSI Single-end Terminator (HD50 M)

Highlights

- Active terminators include a voltage regulator circuit to compensate for fluctuations in the host adapter

Description

Tripp Lite's single ended HD50M active terminator is the one for all of your external SCSI-II applications. Designed for use with external SCSI devices requiring HD50M terminator at the end of a SCSI chain. Tripp Lite's active terminators provide the clearest data signal maximizing signal integrity. Supports fast and ultra single ended devices at 10 or 20 Mbps.

System Requirements

- Any external SCSI device requiring HD50Male terminator at the end of a SCSI chain

Package Includes

- Active external SCSI terminator HD50M SE single-ended

Features

- Active terminators use voltage regulation to compensate for impedance irregularities between various generations of SCSI devices
- All Tripp Lite SCSI products, regardless of the SCSI generation, meet the latest specifications of ANSI
- Tripp Lite offers a complete line of internal and external solutions for SCSI/RAID and fibre channel ranging from the very latest Ultra 320 to legacy SCSI-1 and every combination in between
