

DC to 2500 MHz, CASCADABLE SiGe HBT MMIC AMPLIFIER

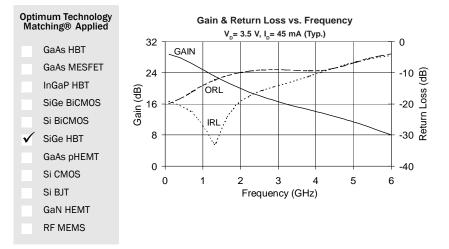

### **Product Description**

RFM

The SGA4563Z is a high performance SiGe HBT MMIC Amplifier. A Darlington configuration featuring one-micron emitters provides high  $F_{\rm T}$  and excellent thermal performance. The heterojunction increases breakdown voltage and minimizes leakage current between junctions. Cancellation of emitter junction non-linearities results in higher suppression of intermodulation products. Only two DC-blocking capacitors, a bias resistor, and an optional RF choke are required for operation.

#### Features

- High Gain: 20.2dB at 1950MHz
- Cascadable 50Ω
- Operates from Single Supply
- Low Thermal Resistance Package

#### **Applications**

- PA Driver Amplifier
- Cellular, PCS, GSM, UMTS
- IF Amplifier
- Wireless Data, Satellite

Operation of this device beyond any one of these limits may cause permanent dam-age. For reliable continuous operation, the device voltage and current must not exceed the maximum operating values specified in the table on page one. Bias Conditions should also satisfy the following expression:

 $I_D V_D < (T_J - T_L) / R_{TH}$ , j-l

#### Caution! ESD sensitive device.

Exceeding any one or a combination of the Absolute Maximum Rating conditions may cause permanent damage to the device. Extended application of Absolute Maximum Rating conditions no reaction of the device may reduce device reliability. Specified typical perfor-mance or functional operation of the device under Absolute Maximum Rating condi-tions is not implied.

|---------------|-------------|---|
| 3             | RF IN       | RF input pin. This pin requires the use of an external DC-blocking capacitor chosen for the frequency of operation.                 |
| 1, 2,<br>4, 5 | GND         | Connection to ground. For optimum RF performance, use via holes as close to ground leads as possible to reduce lead inductance.     |
| 6             | RF OUT/BIAS | RF output and bias pin. DC voltage is present on this pin, therefor a DC-blocking capacitor is necessary for proper opera-<br>tion. |

Mounting Instructions:

1. Use a large droung pad area near device pins 1, 2, 4, and 5 with plated through-holes as shown.

2. We recommend 1 or 2 ounces copper. Measurements for this data sheet were made on a 31mil thick FR-4 board with 1 ounce copper on both sides.
