

TWC-Y High Temperature Series

COTS-Plus 200°C Wet Tantalum

The TWC-Y high temperature series represents a COTS-Plus version of conventional wet electrolytic tantalum capacitors that are designed for use at 200°C. The majority of components listed are now capable of 500 hours of operation at extreme temperature with the applicable derated voltage.

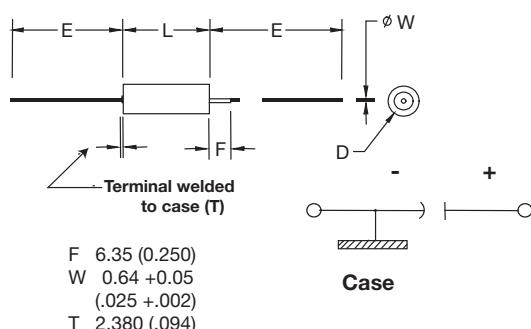

This design includes a welded tantalum can and header assembly that provides a hermetic seal to withstand harsh environments.

This is a new product line so please contact the factory for availability and additional details.

CASE DIMENSIONS: millimeters (inches)

Standard Case Size	AVX Case Size	L	D Basic Case ±0.41 (0.016)	D Insulated Case Max	E ±6.35 (0.250)

All technical data relates to an ambient temperature of +25°C. Capacitance and DF are measured at 120Hz, 0.5RMS with DC bias of 2.2V. DCL is measured at rated voltage after 5 minutes.

Note: AVX reserves the right to supply higher voltage rating in the same case size to the same reliability standards.

+Ratings currently qualified to 300 hours of operation at 200C with 60% rated voltage.

200°C LIFE TEST:

These components are capable of 500 hours of operation at 200°C with the applicable 60% derated voltage, with the exception of those ratings indicated in the table as having only 300 hour qualifications. These ratings will be extended to 500 hour capability after completion of further testing. Following the life test components which are stabilized at 25°C ± 5°C shall exhibit:

Leakage less than 200% the original requirement or ± 10uA (whichever is greater)

ESR not greater than 200% the original requirement

Capacitance increase less than 10% or decrease less than 20% the initial measurement
