

1300 SERIES RECTANGULAR CONNECTORS

Introduction

MINICON 1300 series is a collection of small, rectangular, multi-contact connectors which HIROSE has developed in order to meet the most stringent demands of high performance and small size equipment manufacturing. The number of contacts available are 8, 12, 16, 20, 24, 28, 34, 45, and 60. Connector inserts

(soldering, crimping, and wire wrapping) along with various accessories are available for a wide range of applications. The plug shell has a rugged push-button lock mechanism to ensure reliable connection. These connectors conform to NTT specifications (SPEC NO.1931).

Electrical and Environmental Characteristics

Item	Standard
Contact resistance	5mΩ Max
Current rating	5A
Voltage rating	AC400V
Insulation resistance	1000MΩ min at DC500V
Withstand voltage	AC1200V for 1 minute

Material and Finish

Description	Material	Finish
Molding	Epoxywith	1 light-green colour
Pin contact	Brass	Silver plated
Socket contact	Phosphor bronze	Silver plated
Plug shell	Zinc alloy die cast	Black baked finish (MTT spec:2.5P B6/2 baked finish)
Stopper bracket	Mild steel	
Handle	Mild steel	Bichromic acid treatment

Ordering Information

(1) Shape of terminal opening

P: Male contact
S: Female contact

(2) Series name

13: 1300 series

(3) Number of contacts

(4) Termination

No sign : Soldering
W : Wrapping (signs for sub-groups of "wrapping" are suffixed to W, see tables)

B: Center row contact

(wire side) long type

(5) Accessories

CT: Plug case with vertical cable inlet opening

CE: Plug case with horizontal cable inlet opening

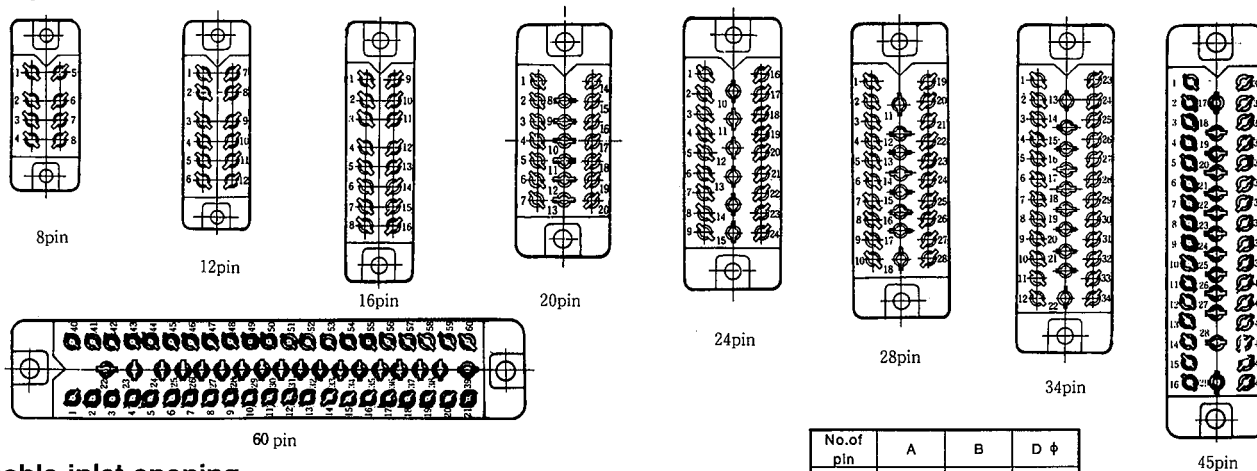

SB: Stopper bracket

H: Handle

(6) Serial signs for accessories

Contact Arrangements

Figures show connectors viewed from the surface of sockets, namely, the fitting side of socket connectors. Plug units are arranged symmetrically.

TOP TOUCH LOCKING CONNECTOR (NTT Specification)

General

These connectors have a top-touch lock, developed from the standard side lock, to increase the connector packing density. Developed jointly with NTT as an in-door device for NTT data communications. The connectors are specified in NTT Specifications SPEC

1931.

Available in three models of 34, 45 and 60 pins. The connectors are the well-known HIROSE original 1300 series, which have a broad variety of applications.

Features

- (1) Facilitates high-density connector packaging due to top-touch lock.
- (2) Locking mechanism requires no resetting, and a well-designed grip allows you to insert and extract the connector easily. The secure holding force assures that the connector will withstand up to 30 kg in any direction.
- (3) Plug case is easy to assemble and maintain because it is divided, including the cable inlet.
- (4) All plug cases have the same packaging height, allowing you to unify the connector packaging space.
- (5) Made of ABS resin, plug case is light, durable, and attractive.

Materials

Description	Material	Finish
Insulator	Epoxy resin	Brownish green
Male terminal	Brass	Silver-plated
Female terminal	Phosphor bronze	Silver-plated

TOP TOUCH LOCKING CONNECTOR (HIROSE Original)

General

The 1300 series top touch locking 24-contact connectors are of the same design as the well-known 1600 series top-touch locking connectors. The 1300 series connectors feature a plug case of lightweight, sturdy plastic with a cable inlet allowing cable entry in either

straight or lateral side as necessary, and simple, single-operation connector insertion and extraction. These are suitable for enhancing the packaging density.

Main Specifications

Item	Standard
Contact resistance	5mΩ or less at 1 ADC
Insulation resistance	1,000 MΩ or higher at 500 VDC
Withstand voltage	AC1200V for one minute
Current rating	5A

Main Material

Description	Material	Finish
Insulator	Epoxy resin	Bronish green
Male terminal	Brass	Silver-plated
Female terminal	Phosphor bronze	Silver-plated
Plug case	ABS	Black
Stopper bracket	Steel	Treated with dichromate over zinc-plating

General

Based on the 1300 Series connectors with 8 or more contacts, this connector is designed to be compact and light in weight. Grey polyacetal is used as the material for the plug case and bracket. The case has a unique mono-blocking mechanism, enabling easy and

reliable one-touch operation. Other special features are screwless insert assembly with retainers and a deep receptacle shell which offers a low-profile sinking mount.

Electrical Characteristics

Item	Standard
Contact resistance	5mΩ or less at DC500V
Insulation resistance	1000M Ω or higher at DC500V
Withstand voltage	AC1200V for 1 minute
Current rating	5A

1300 SERIES SIDE-LOCK TYPE PLUG CASES

General

The 1300 Series plug cases and stopper brackets for both upright and transverse receptacles are available in nine models, with 8, 12, 16, 20, 24, 28, 34, 45, or 60 positions. These are interchangeable with conventional pushbutton-lock type plug cases and stopper brackets

(including those designated by NTT specification 1931). In addition to their simple construction, these general-purpose connectors are highly reliable, lightweight, and durable and feature outstanding operability.

Material and Finish

Description	Material	Finish
Plug Shell	ABS	Black(Matte finish)
Stopper Bracket	Steel	Zinc chromated

Features

- (1) The lock mechanism is very simple and secure.
- (2) The orientation of the cable inlet port of plug case, vertical or horizontal, can be selected by the user. It is capped on the free side.
- (3) The plug case is made of a tough ABS resin, that is lightweight and durable.
- (4) The plug case is split at the center of the cable inlet port and requires fewer screws. It is very workable, especially when connecting wires. It is also convenient for assembly and maintenance operations.
- (5) The plug case uses an attractive design that matches well with the external appearance of all equipment.
- (6) Solder or lapping type connector units in the 1300 series (except for S-1360ECL213-0457-9) can be connected to the plug case.
- (7) Both the plug case and stopper bracket are interchangeable, respectively, with the die-cast frame plug case (12-CTA, CEA type), and with the stopper bracket.
