	- 2000-V Human-Body Model (A114-A)	2B1 🛛		36	2A1		
	- 200-V Machine Model (A115-A)	2B2		35	2A2		
	– 1000-V Charged-Device Model (C101)	GND [			GND		
desr	ription	2B3 [			2A3		
4030		2B4 [			2A4		
	The SN74CBTK16245 device provides 16 bits of	V <sub>CC</sub>			V <sub>CC</sub>		
	high-speed TTL-compatible bus switching in a	2B5			2A5		
	standard '16245 device pinout. The low on-state	2B6			2A6		
	resistance of the switch allows connections to be	GND			GND		
	made with minimal propagation delay.	2B7 [			2A7		
	The A and B ports have an active-clamp	2B8 [	23	26	2A8		

The A and B ports have an active-clamp undershoot-protection circuit. When there is an undershoot, the active-clamp circuit is enabled, and current from  $V_{CC}$  is supplied to clamp the output, preventing the pass transistor from turning on.

NC - No internal connection

25 20E

NC 24

The device is organized as two 8-bit low-impedance switches with separate output-enable ( $\overline{OE}$ ) inputs. When  $\overline{OE}$  is low, the switch is on, and data can flow from the A port to the B port, or vice versa. When  $\overline{OE}$  is high, the switch is open, and the high-impedance state exists between the two ports.

This device is fully specified for partial-power-down applications using I<sub>off</sub>. The I<sub>off</sub> circuitry disables the outputs, preventing damaging current backflow through the device when it is powered down.

#### **ORDERING INFORMATION**

<sup>†</sup>Package drawings, standard packing quantities, thermal data, symbolization, and PCB design guidelines are available at www.ti.com/sc/package.

Please be aware that an important notice concerning availability, standard warranty, and use in critical applications of Texas Instruments semiconductor products and disclaimers thereto appears at the end of this data sheet.

Widebus is a trademark of Texas Instruments.

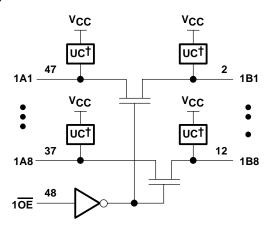

PRODUCTION DATA information is current as of publication date. Products conform to specifications per the terms of Texas Instruments standard warranty. Production processing does not necessarily include testing of all parameters.

## logic diagram (positive logic)

<sup>†</sup> Undershoot clamp

SCDS105D - APRIL 2000 - REVISED NOVEMBER 2001

### absolute maximum ratings over operating free-air temperature range (unless otherwise noted)<sup>†</sup>

Supply voltage range, V <sub>CC</sub>		–0.5 V to 7 V
Input voltage range, VI (see Note 1)		–0.5 V to 7 V
Continuous channel current		128 mA
Input clamp current, I <sub>IK</sub> (V <sub>I/O</sub> < 0)		–50 mA
Package thermal impedance, $\theta_{JA}$ (see Note 2):	: DGG package	70°C/W
	DGV package	58°C/W
	DL package	63°C/W
Storage temperature range, T <sub>stg</sub>		–65°C to 150°C

<sup>†</sup> Stresses beyond those listed under "absolute maximum ratings" may cause permanent damage to the device. These are stress ratings only, and functional operation of the device at these or any other conditions beyond those indicated under "recommended operating conditions" is not implied. Exposure to absolute-maximum-rated conditions for extended periods may affect device reliability.

NOTES: 1. The input and output negative-voltage ratings may be exceeded if the input and output clamp-current ratings are observed.

2. The package thermal impedance is calculated in accordance with JESD 51-7.

#### recommended operating conditions (see Note 3)

		MIN	MAX	UNIT
VCC	Supply voltage	4	5.5	V
VIH	High-level control input voltage	2		V
$V_{IL}$	Low-level control input voltage		0.8	V
Т <sub>А</sub>	Operating free-air temperature	-40	85	°C

NOTE 3: All unused control inputs of the device must be held at V<sub>CC</sub> or GND to ensure proper device operation. Refer to the TI application report, Implications of Slow or Floating CMOS Inputs, literature number SCBA004.

# electrical characteristics over recommended operating free-air temperature range (unless otherwise noted)

PAR	AMETER		MIN	TYP‡	MAX	UNIT		
VIK		V <sub>CC</sub> = 4.5 V,	lı = –18 mA				-1.2	V
VIKU		V <sub>CC</sub> = 5.5 V,	$0 \text{ mA} \ge I_I \ge -50 \text{ mA},$	OE = 5.5 V			-2	V
		$V_{CC} = 0,$	V <sub>I</sub> = 5.5 V				10	
1		V <sub>CC</sub> = 5.5 V,	$V_I = 5.5 V \text{ or GND}$				±1	μA
loff		$V_{CC} = 0,$	$V_{I} \text{ or } V_{O} = 0 \text{ to } 5.5 \text{ V}$				20	μΑ
ICC		V <sub>CC</sub> = 5.5 V,	$V_I = V_{CC} \text{ or } GND,$	IO = 0			3	μΑ
∆ICC§	Control inputs	V <sub>CC</sub> = 5.5 V,	One input at 3.4 V,	Other inputs at $V_{\mbox{CC}}$ or GND			2.5	mA
Ci	Control inputs	V <sub>I</sub> = 3 V or 0				3.5		pF
C <sub>io(OFF)</sub>		$V_{O} = 3 V \text{ or } 0,$	$\overline{OE} = V_{CC}$			5.5		pF
		$V_{CC} = 4 V,$ TYP at $V_{CC} = 4 V$	V <sub>I</sub> = 2.4 V,	lı = 15 mA		14	20	
ron¶			V <sub>1</sub> = 0	IJ = 64 mA		5	7	Ω
		$V_{CC} = 4.5 V$	v] = 0	l <sub>l</sub> = 30 mA		5	7	
			V <sub>I</sub> = 2.4 V,	lj = 15 mA		8	12	

<sup>‡</sup> All typical values are at  $V_{CC} = 5 V$ ,  $T_A = 25^{\circ}C$ .

§ This is the increase in supply current for each input that is at the specified TTL-voltage level rather than V<sub>CC</sub> or GND.

¶ Measured by the voltage drop between the A and B terminals at the indicated current through the switch. On-state resistance is determined by the lower of the voltages of the two (A or B) terminals.

SCDS105D - APRIL 2000 - REVISED NOVEMBER 2001

# switching characteristics over recommended operating free-air temperature range (unless otherwise noted) (see Figure 3)

PARAMETER	FROM (INPUT)	TO (OUTPUT)	V <sub>CC</sub> = 4 V	V <sub>CC</sub> = ± 0.5	= 5 V 5 V	UNIT
		(001101)	MIN MAX	MIN	MAX	
t <sub>pd</sub> †	A or B	B or A	0.35		0.25	ns
ten	OE	A or B	7.4	1.6	4.9	ns
<sup>t</sup> dis	OE	A or B	7.4	4.2	7.5	ns

<sup>†</sup> The propagation delay is the calculated RC time constant of the typical on-state resistance of the switch and the specified load capacitance, when driven by an ideal voltage source (zero output impedance).

## undershoot characteristics

PARAMETER	TEST CONDITIONS	MIN	TYP‡	MAX	UNIT
νουτυ	See Figures 1 and 2, and Table 1	2	V <sub>OH</sub> -0.3		V

<sup>‡</sup> All typical values are at V<sub>CC</sub> = 5 V (unless otherwise noted), T<sub>A</sub> = 25°C.

VCC	5.5	V

#### **Table 1. Device Test Conditions**

§ Other B-port outputs are open.

SCDS105D - APRIL 2000 - REVISED NOVEMBER 2001

## PARAMETER MEASUREMENT INFORMATION

NOTES: A. CL includes probe and jig capacitance.

- B. Waveform 1 is for an output with internal conditions such that the output is low except when disabled by the output control. Waveform 2 is for an output with internal conditions such that the output is high except when disabled by the output control.
- C. All input pulses are supplied by generators having the following characteristics: PRR  $\leq$  10 MHz, Z<sub>O</sub> = 50  $\Omega$ , t<sub>f</sub>  $\leq$  2.5 ns, t<sub>f</sub>  $\leq$  2.5 ns.
- D. The outputs are measured one at a time with one transition per measurement.
- E. tpLz and tpHz are the same as tdis.
- F. tpzL and tpzH are the same as ten.
- G. tpLH and tpHL are the same as tpd.

<sup>(1)</sup> The marketing status values are defined as follows:

ACTIVE: Product device recommended for new designs.

LIFEBUY: TI has announced that the device will be discontinued, and a lifetime-buy period is in effect.

NRND: Not recommended for new designs. Device is in production to support existing customers, but TI does not recommend using this part in a new design.

**PREVIEW:** Device has been announced but is not in production. Samples may or may not be available.

**OBSOLETE:** TI has discontinued the production of the device.

(2) Eco Plan - The planned eco-friendly classification: Pb-Free (RoHS), Pb-Free (RoHS Exempt), or Green (RoHS & no Sb/Br) - please check http://www.ti.com/productcontent for the latest availability information and additional product content details.

**TBD:** The Pb-Free/Green conversion plan has not been defined.

**Pb-Free (RoHS):** TI's terms "Lead-Free" or "Pb-Free" mean semiconductor products that are compatible with the current RoHS requirements for all 6 substances, including the requirement that lead not exceed 0.1% by weight in homogeneous materials. Where designed to be soldered at high temperatures, TI Pb-Free products are suitable for use in specified lead-free processes.

**Pb-Free (RoHS Exempt):** This component has a RoHS exemption for either 1) lead-based flip-chip solder bumps used between the die and package, or 2) lead-based die adhesive used between the die and leadframe. The component is otherwise considered Pb-Free (RoHS compatible) as defined above.

Green (RoHS & no Sb/Br): TI defines "Green" to mean Pb-Free (RoHS compatible), and free of Bromine (Br) and Antimony (Sb) based flame retardants (Br or Sb do not exceed 0.1% by weight in homogeneous material)

<sup>(3)</sup> MSL, Peak Temp. -- The Moisture Sensitivity Level rating according to the JEDEC industry standard classifications, and peak solder temperature.

<sup>(4)</sup> Multiple Top-Side Markings will be inside parentheses. Only one Top-Side Marking contained in parentheses and separated by a "~" will appear on a device. If a line is indented then it is a continuation of the previous line and the two combined represent the entire Top-Side Marking for that device.

Important Information and Disclaimer: The information provided on this page represents TI's knowledge and belief as of the date that it is provided. TI bases its knowledge and belief on information provided by third parties, and makes no representation or warranty as to the accuracy of such information. Efforts are underway to better integrate information from third parties. TI has taken and continues to take reasonable steps to provide representative and accurate information but may not have conducted destructive testing or chemical analysis on incoming materials and chemicals. TI and TI suppliers consider certain information to be proprietary, and thus CAS numbers and other limited information may not be available for release.

In no event shall TI's liability arising out of such information exceed the total purchase price of the TI part(s) at issue in this document sold by TI to Customer on an annual basis.

#### **IMPORTANT NOTICE**

Texas Instruments Incorporated and its subsidiaries (TI) reserve the right to make corrections, enhancements, improvements and other changes to its semiconductor products and services per JESD46, latest issue, and to discontinue any product or service per JESD48, latest issue. Buyers should obtain the latest relevant information before placing orders and should verify that such information is current and complete. All semiconductor products (also referred to herein as "components") are sold subject to TI's terms and conditions of sale supplied at the time of order acknowledgment.

TI warrants performance of its components to the specifications applicable at the time of sale, in accordance with the warranty in TI's terms and conditions of sale of semiconductor products. Testing and other quality control techniques are used to the extent TI deems necessary to support this warranty. Except where mandated by applicable law, testing of all parameters of each component is not necessarily performed.

TI assumes no liability for applications assistance or the design of Buyers' products. Buyers are responsible for their products and applications using TI components. To minimize the risks associated with Buyers' products and applications, Buyers should provide adequate design and operating safeguards.

TI does not warrant or represent that any license, either express or implied, is granted under any patent right, copyright, mask work right, or other intellectual property right relating to any combination, machine, or process in which TI components or services are used. Information published by TI regarding third-party products or services does not constitute a license to use such products or services or a warranty or endorsement thereof. Use of such information may require a license from a third party under the patents or other intellectual property of the third party, or a license from TI under the patents or other intellectual property of TI.

Reproduction of significant portions of TI information in TI data books or data sheets is permissible only if reproduction is without alteration and is accompanied by all associated warranties, conditions, limitations, and notices. TI is not responsible or liable for such altered documentation. Information of third parties may be subject to additional restrictions.

Resale of TI components or services with statements different from or beyond the parameters stated by TI for that component or service voids all express and any implied warranties for the associated TI component or service and is an unfair and deceptive business practice. TI is not responsible or liable for any such statements.

Buyer acknowledges and agrees that it is solely responsible for compliance with all legal, regulatory and safety-related requirements concerning its products, and any use of TI components in its applications, notwithstanding any applications-related information or support that may be provided by TI. Buyer represents and agrees that it has all the necessary expertise to create and implement safeguards which anticipate dangerous consequences of failures, monitor failures and their consequences, lessen the likelihood of failures that might cause harm and take appropriate remedial actions. Buyer will fully indemnify TI and its representatives against any damages arising out of the use of any TI components in safety-critical applications.

In some cases, TI components may be promoted specifically to facilitate safety-related applications. With such components, TI's goal is to help enable customers to design and create their own end-product solutions that meet applicable functional safety standards and requirements. Nonetheless, such components are subject to these terms.

No TI components are authorized for use in FDA Class III (or similar life-critical medical equipment) unless authorized officers of the parties have executed a special agreement specifically governing such use.

Only those TI components which TI has specifically designated as military grade or "enhanced plastic" are designed and intended for use in military/aerospace applications or environments. Buyer acknowledges and agrees that any military or aerospace use of TI components which have *not* been so designated is solely at the Buyer's risk, and that Buyer is solely responsible for compliance with all legal and regulatory requirements in connection with such use.

TI has specifically designated certain components as meeting ISO/TS16949 requirements, mainly for automotive use. In any case of use of non-designated products, TI will not be responsible for any failure to meet ISO/TS16949.
