

FEATURES

- Single-Chip Mixer/Oscillator and Phase-Locked Loop (PLL) Synthesizer
- Three-Band Local Oscillator
- I²C Bus Protocol (Bidirectional Data Transmission)
- 30-V Tuning Voltage Output
- Four NPN-Type Band-Switch Drivers
- Programmable Reference Divider Ratio (512, 640, or 1024)
- External 4-Pin Intermediate Frequency (IF) Filter Between Mixer Output and IF Amplifier Input
- 5-V Power Supply
- 30-Pin Thin Shrink Small-Outline Package (TSSOP)

APPLICATIONS

- TVs
- VCR/DVD Recorders
- Set-Top Boxes

P0038-01

DESCRIPTION

The SN761678B is a synthesized tuner IC designed for TV tuning systems. The circuit consists of a phase-locked loop (PLL) synthesizer, three-band local oscillator and mixer, 30-V output tuning amplifier, and four NPN band-switch drivers. The device is available in a small-outline package. A 15-bit programmable counter and reference divider are controlled by I²C bus protocol. Tuning step frequency is selectable by this reference divider ratio for a crystal oscillator.

This integrated circuit can be damaged by ESD. Texas Instruments recommends that all integrated circuits be handled with appropriate precautions. Failure to observe proper handling and installation procedures can cause damage.

ESD damage can range from subtle performance degradation to complete device failure. Precision integrated circuits may be more susceptible to damage because very small parametric changes could cause the device not to meet its published specifications.

Please be aware that an important notice concerning availability, standard warranty, and use in critical applications of Texas Instruments semiconductor products and disclaimers thereto appears at the end of this data sheet.

Absolute Maximum Ratings

over operating free-air temperature range (unless otherwise noted) ⁽¹⁾

| | | |
|---|--|-----------------|
| Supply voltage range, $V_{CC}^{(2)}$ | VCC (pin 11) | –0.4 V to 6.5 V |
| Input voltage 1, $V_{GND}^{(2)}$ | OSC GND, RF GND (pins 3, 27) | –0.4 V to 0.4 V |
| Input voltage 2, $V_{VTU}^{(2)}$ | VTU (pin 14) | –0.4 V to 35 V |
| Input voltage 3, $V_{IN}^{(2)}$ | Other pins (1, 2, 4–9, 12, 13, 15–26, 28–30) | –0.4 V to 6.5 V |
| Continuous total dissipation, $P_D^{(3)}$ | $T_A \leq 25^\circ\text{C}$ | 1071 mW |
| Operating free-air temperature range, T_A | | –20°C to 85°C |
| Storage temperature range, T_{stg} | | –65°C to 150°C |
| Maximum junction temperature, T_J | | 150°C |
| Maximum short-circuit time, $t_{SC(max)}$ | Each pin to V_{CC} or to GND | 10 s |

- (1) Stresses beyond those listed under "absolute maximum ratings" may cause permanent damage to the device. These are stress ratings only, and functional operation of the device at these or any other conditions beyond those indicated under "recommended operating conditions" is not implied. Exposure to absolute-maximum-rated conditions for extended periods may affect device reliability.
- (2) Voltage values are with respect to the IF GND of the circuit.
- (3) Derating factor is 8.57 mW/°C for $T_A \geq 25^\circ\text{C}$.

Recommended Operating Conditions

| | MIN | NOM | MAX | UNIT |
|---|-------------|-----|-----|-------|
| Supply voltage, V_{CC} | 4.5 | 5 | 5.5 | V |
| Tuning supply voltage, V_{TU} | | 30 | 33 | V |
| Output current of band switch, I_{BS} | One port on | | | 10 mA |
| Operating free-air temperature, T_A | –20 | | 85 | °C |

Electrical Characteristics – Total Device and Serial Interface

$V_{CC} = 4.5\text{ V to }5.5\text{ V}$, $T_A = -20^\circ\text{C to }85^\circ\text{C}$ (unless otherwise noted)

| PARAMETER | | TEST CONDITIONS | MIN | TYP | MAX | UNIT |
|--|--|--|-----|-----|----------|---------------|
| I_{CC1} | Supply current 1 | | | 60 | | mA |
| I_{CC2} | Supply current 2 | One band switch on ($I_{BS} = 10\text{ mA}$) | | 70 | | mA |
| V_{IH} | High-level input voltage (SCL, SDA) | | 2.8 | | V_{CC} | V |
| V_{IL} | Low-level input voltage (SCL, SDA) | | | | 1.4 | V |
| I_{IH} | High-level input current (SCL, SDA) | | | | 10 | μA |
| I_{IL} | Low-level input current (SCL, SDA) | | –10 | | | μA |
| V_{POR} | Power-on-reset supply voltage (threshold of supply voltage between reset and operation mode) | | 2.1 | 2.8 | 3.6 | V |
| I²C Interface | | | | | | |
| V_{ASH} | Address-select high-input voltage (AS) | $V_{CC} = 5\text{ V}$ | 4.5 | | 5 | V |
| V_{ASM1} | Address-select mid1-input voltage (AS) | $V_{CC} = 5\text{ V}$ | 2 | | 3 | V |
| V_{ASM2} | Address-select mid2-input voltage (AS) | $V_{CC} = 5\text{ V}$ | 1 | | 1.5 | V |
| V_{ASL} | Address-select low-input voltage (AS) | $V_{CC} = 5\text{ V}$ | | | 0.5 | V |
| I_{ASH} | Address-select high-input current (AS) | $V_{CC} = 5\text{ V}$, $T_A = 25^\circ\text{C}$ | | | 140 | μA |
| I_{ASL} | Address-select low-input current (AS) | $V_{CC} = 5\text{ V}$, $T_A = 25^\circ\text{C}$ | –50 | | | μA |
| V_{ADC} | ADC input voltage | See Table 8 | 0 | | V_{CC} | V |
| I_{ADH} | ADC high-level input current | $V_{ADC} = V_{CC}$ | | | 10 | μA |
| I_{ADL} | ADC low-level input current | $V_{ADC} = 0\text{ V}$ | –50 | | | μA |
| V_{OL} | Low-level output voltage (SDA) | $V_{CC} = 5\text{ V}$, $I_{OL} = 3\text{ mA}$ | | | 0.4 | V |
| I_{SDAH} | High-level output leakage current (SDA) | $V_{SDA} = 5.5\text{ V}$ | | | 10 | μA |
| f_{SCL} | Clock frequency (SCL) | | | 100 | 400 | kHz |
| I²C Timing (see Figure 17) | | | | | | |
| $t_{hd(DAT)}$ | Data hold time | | 0 | | | μs |
| $t_{(BUF)}$ | Bus free time | | 1.3 | | | μs |
| $t_{hd(STA)}$ | Start hold time | | 0.6 | | | μs |
| $t_{(Low)}$ | SCL-low hold time | | 1.3 | | | μs |
| $t_{(High)}$ | SCL-high hold time | | 0.6 | | | μs |
| $t_{su(STA)}$ | Start setup time | | 0.6 | | | μs |
| $t_{su(DAT)}$ | Data setup time | | 0.1 | | | μs |
| t_r | SCL, SDA rise time | | | | 0.3 | μs |
| t_f | SCL, SDA fall time | | | | 0.3 | μs |
| $t_{su(STO)}$ | Stop setup time | | 0.6 | | | μs |

Electrical Characteristics – PLL and Band Switch

$V_{CC} = 4.5\text{ V to }5.5\text{ V}$, $T_A = -20^{\circ}\text{C to }85^{\circ}\text{C}$ (unless otherwise noted)

| PARAMETER | | TEST CONDITIONS | MIN | TYP | MAX | UNIT |
|--------------|--|--|-----|------|-------|------------|
| N | Divider ratio | 15-bit frequency word | 256 | | 32767 | |
| f_{XTAL} | Crystal oscillator frequency | $R_{XTAL} = 25\ \Omega$ to $300\ \Omega$ | 3.2 | 4 | 4.48 | MHz |
| Z_{XTAL} | Crystal oscillator input impedance | | | 1.6 | | k Ω |
| V_{IXTAL2} | Minimum reference input sensitivity (XTAL) | 4 MHz, ac coupling with 0.1- μ F capacitor | | | 100 | mVp-p |
| V_{VTUL} | Tuning amplifier low-level output voltage | $R_L = 22\text{ k}\Omega$, $V_{TU} = 33\text{ V}$ | | 0.4 | 0.5 | V |
| I_{VTUOFF} | Tuning amplifier leakage current (off) | OS = 1, $V_{TU} = 33\text{ V}$ | | | 10 | μ A |
| I_{CPH} | Charge-pump high-level input current | CP = 1 | | 280 | | μ A |
| I_{CPL} | Charge-pump low-level input current | CP = 0 | | 60 | | μ A |
| V_{CP} | Charge-pump output voltage | PLL locked | | 1.95 | | V |
| I_{CPOFF} | Charge-pump leakage current | T2 = 0, T1 = 1, $V_{CP} = 2\text{ V}$, $T_A = 25^{\circ}\text{C}$ | –15 | | 15 | nA |
| I_{BS} | Band-switch driver output current | | | | 10 | mA |
| V_{BS1} | Band-switch driver output voltage | $I_{BS} = 10\text{ mA}$ | 3 | | | V |
| V_{BS2} | | $I_{BS} = 10\text{ mA}$, $V_{CC} = 5\text{ V}$, $T_A = 25^{\circ}\text{C}$ | 3.5 | 3.9 | | |
| I_{BSOFF} | Band-switch driver leakage current | $V_{BS} = 0\text{ V}$ | | | 3 | μ A |

Electrical Characteristics – Mixer, Oscillator, IF Amplifier

$V_{CC} = 5\text{ V}$, $T_A = 25^\circ\text{C}$, measured in [Figure 18](#) reference measurement circuit at 50- Ω system,
IF filter characteristics: $f_{\text{peak}} = 43\text{ MHz}$ (unless otherwise noted)

PACKAGING INFORMATION

| Orderable Device | Status (1) | Package Type | Package Drawing | Pins | Package Qty | Eco Plan (2) | Lead/Ball Finish | MSL Peak Temp (3) | Op Temp (°C) | Device Marking (4/5) | Samples |
|------------------|---------------|--------------|-----------------|------|-------------|-------------------------|------------------|----------------------|--------------|-------------------------|---------|
| SN761678BDBTR | OBSOLETE | TSSOP | DBT | 30 | | Green (RoHS & no Sb/Br) | CU NIPDAU | Level-2-260C-1 YEAR | -20 to 85 | B1678B | |
| SN761678BDBTRG4 | OBSOLETE | TSSOP | DBT | 30 | | Green (RoHS & no Sb/Br) | CU NIPDAU | Level-2-260C-1 YEAR | -20 to 85 | B1678B | |
| SN761678BDCHR | OBSOLETE | TSSOP | DCH | 30 | | Green (RoHS & no Sb/Br) | CU NIPDAU | Level-2-260C-1 YEAR | -20 to 85 | 1678BDCH | |

(1) The marketing status values are defined as follows:

ACTIVE: Product device recommended for new designs.

LIFEBUY: TI has announced that the device will be discontinued, and a lifetime-buy period is in effect.

NRND: Not recommended for new designs. Device is in production to support existing customers, but TI does not recommend using this part in a new design.

PREVIEW: Device has been announced but is not in production. Samples may or may not be available.

OBSOLETE: TI has discontinued the production of the device.

(2) Eco Plan - The planned eco-friendly classification: Pb-Free (RoHS), Pb-Free (RoHS Exempt), or Green (RoHS & no Sb/Br) - please check <http://www.ti.com/productcontent> for the latest availability information and additional product content details.

TBD: The Pb-Free/Green conversion plan has not been defined.

Pb-Free (RoHS): TI's terms "Lead-Free" or "Pb-Free" mean semiconductor products that are compatible with the current RoHS requirements for all 6 substances, including the requirement that lead not exceed 0.1% by weight in homogeneous materials. Where designed to be soldered at high temperatures, TI Pb-Free products are suitable for use in specified lead-free processes.

Pb-Free (RoHS Exempt): This component has a RoHS exemption for either 1) lead-based flip-chip solder bumps used between the die and package, or 2) lead-based die adhesive used between the die and leadframe. The component is otherwise considered Pb-Free (RoHS compatible) as defined above.

Green (RoHS & no Sb/Br): TI defines "Green" to mean Pb-Free (RoHS compatible), and free of Bromine (Br) and Antimony (Sb) based flame retardants (Br or Sb do not exceed 0.1% by weight in homogeneous material)

(3) MSL, Peak Temp. -- The Moisture Sensitivity Level rating according to the JEDEC industry standard classifications, and peak solder temperature.

(4) There may be additional marking, which relates to the logo, the lot trace code information, or the environmental category on the device.

(5) Multiple Device Markings will be inside parentheses. Only one Device Marking contained in parentheses and separated by a "~" will appear on a device. If a line is indented then it is a continuation of the previous line and the two combined represent the entire Device Marking for that device.

Important Information and Disclaimer: The information provided on this page represents TI's knowledge and belief as of the date that it is provided. TI bases its knowledge and belief on information provided by third parties, and makes no representation or warranty as to the accuracy of such information. Efforts are underway to better integrate information from third parties. TI has taken and continues to take reasonable steps to provide representative and accurate information but may not have conducted destructive testing or chemical analysis on incoming materials and chemicals. TI and TI suppliers consider certain information to be proprietary, and thus CAS numbers and other limited information may not be available for release.

In no event shall TI's liability arising out of such information exceed the total purchase price of the TI part(s) at issue in this document sold by TI to Customer on an annual basis.

PLASTIC SMALL OUTLINE

- NOTES:
- A. All linear dimensions are in millimeters. Dimensioning and tolerancing per ASME Y14.5M-1994.
 - B. This drawing is subject to change without notice.
 - C. Body dimensions do not include mold flash or protrusion.
 - D. Falls within JEDEC MO-153.

IMPORTANT NOTICE

Texas Instruments Incorporated and its subsidiaries (TI) reserve the right to make corrections, enhancements, improvements and other changes to its semiconductor products and services per JESD46, latest issue, and to discontinue any product or service per JESD48, latest issue. Buyers should obtain the latest relevant information before placing orders and should verify that such information is current and complete. All semiconductor products (also referred to herein as "components") are sold subject to TI's terms and conditions of sale supplied at the time of order acknowledgment.

TI warrants performance of its components to the specifications applicable at the time of sale, in accordance with the warranty in TI's terms and conditions of sale of semiconductor products. Testing and other quality control techniques are used to the extent TI deems necessary to support this warranty. Except where mandated by applicable law, testing of all parameters of each component is not necessarily performed.

TI assumes no liability for applications assistance or the design of Buyers' products. Buyers are responsible for their products and applications using TI components. To minimize the risks associated with Buyers' products and applications, Buyers should provide adequate design and operating safeguards.

TI does not warrant or represent that any license, either express or implied, is granted under any patent right, copyright, mask work right, or other intellectual property right relating to any combination, machine, or process in which TI components or services are used. Information published by TI regarding third-party products or services does not constitute a license to use such products or services or a warranty or endorsement thereof. Use of such information may require a license from a third party under the patents or other intellectual property of the third party, or a license from TI under the patents or other intellectual property of TI.

Reproduction of significant portions of TI information in TI data books or data sheets is permissible only if reproduction is without alteration and is accompanied by all associated warranties, conditions, limitations, and notices. TI is not responsible or liable for such altered documentation. Information of third parties may be subject to additional restrictions.

Resale of TI components or services with statements different from or beyond the parameters stated by TI for that component or service voids all express and any implied warranties for the associated TI component or service and is an unfair and deceptive business practice. TI is not responsible or liable for any such statements.

Buyer acknowledges and agrees that it is solely responsible for compliance with all legal, regulatory and safety-related requirements concerning its products, and any use of TI components in its applications, notwithstanding any applications-related information or support that may be provided by TI. Buyer represents and agrees that it has all the necessary expertise to create and implement safeguards which anticipate dangerous consequences of failures, monitor failures and their consequences, lessen the likelihood of failures that might cause harm and take appropriate remedial actions. Buyer will fully indemnify TI and its representatives against any damages arising out of the use of any TI components in safety-critical applications.

In some cases, TI components may be promoted specifically to facilitate safety-related applications. With such components, TI's goal is to help enable customers to design and create their own end-product solutions that meet applicable functional safety standards and requirements. Nonetheless, such components are subject to these terms.

No TI components are authorized for use in FDA Class III (or similar life-critical medical equipment) unless authorized officers of the parties have executed a special agreement specifically governing such use.

Only those TI components which TI has specifically designated as military grade or "enhanced plastic" are designed and intended for use in military/aerospace applications or environments. Buyer acknowledges and agrees that any military or aerospace use of TI components which have **not** been so designated is solely at the Buyer's risk, and that Buyer is solely responsible for compliance with all legal and regulatory requirements in connection with such use.

TI has specifically designated certain components as meeting ISO/TS16949 requirements, mainly for automotive use. In any case of use of non-designated products, TI will not be responsible for any failure to meet ISO/TS16949.
