Please read this notice before using the TAIYO YUDEN products.

REMINDERS

Product information in this catalog is as of October 2013. All of the contents specified herein are subject to change without notice due to technical improvements, etc. Therefore, please check for the latest information carefully before practical application or usage of the Products.

Please note that TAIYO YUDEN CO., LTD. shall not be responsible for any defects in products or equipment incorporating such products, which are caused under the conditions other than those specified in this catalog or individual specification.

- Please contact TAIYO YUDEN CO., LTD. for further details of product specifications as the individual specification is available.
- Please conduct validation and verification of products in actual condition of mounting and operating environment before commercial shipment of the equipment.
- All electronic components or functional modules listed in this catalog are developed, designed and intended for use in general electronics equipment.(for AV, office automation, household, office supply, information service, telecommunications, (such as mobile phone or PC) etc.). Before incorporating the components or devices into any equipment in the field such as transportation,(automotive control, train control, ship control), transportation signal, disaster prevention, medical, public information network (telephone exchange, base station) etc. which may have direct influence to harm or injure a human body, please contact TAIYO YUDEN CO., LTD. for more detail in advance.

Do not incorporate the products into any equipment in fields such as aerospace, aviation, nuclear control, submarine system, military, etc. where higher safety and reliability are especially required.

In addition, even electronic components or functional modules that are used for the general electronic equipment, if the equipment or the electric circuit require high safety or reliability function or performances, a sufficient reliability evaluation check for safety shall be performed before commercial shipment and moreover, due consideration to install a protective circuit is strongly recommended at customer's design stage.

- The contents of this catalog are applicable to the products which are purchased from our sales offices or distributors (so called "TAIYO YUDEN's official sales channel").
 - It is only applicable to the products purchased from any of TAIYO YUDEN's official sales channel.
- Please note that TAIYO YUDEN CO., LTD. shall have no responsibility for any controversies or disputes that may occur in connection with a third party's intellectual property rights and other related rights arising from your usage of products in this catalog. TAIYO YUDEN CO., LTD. grants no license for such rights.
- Caution for export

Certain items in this catalog may require specific procedures for export according to "Foreign Exchange and Foreign Trade Control Law" of Japan, "U.S. Export Administration Regulations", and other applicable regulations. Should you have any question or inquiry on this matter, please contact our sales staff.

METAL CORE SMD POWER INDUCTORS(MCOIL[™] MD SERIES)

- $\mbox{\%}$) The temperature rise current value (Idc2) is the DC current value having temperature increase up to 40°C. (at 20°C)
- X) The rated current is the DC current value that satisfies both of current value saturation current value and temperature rise current value.

| | 3 | +85±2 | | 30±3 | | | |
| | 4 | Room temperature | | Within 3 | | | |

| 17. Damp heat | | | | |
|------------------|--|----------------|--|--|
| Specified Value | MDKK1616 | | Inductance change : Within $\pm 10\%$ No significant abnormality in appearance. | |
| | MDKK2020, MDMK2020 | | | |
| | MDKK3030, MDMK3030 | | | |
| | MDMK4040 | | | |
| | MDPK5050 | | | |
| | The test samples shall be soldered to the test board by the reflow. | | | |
| Test Methods and | The test samples shall be placed in thermostatic oven set at specified temperature and humidity as shown in below table. | | | |
| Remarks | Temperature | 60±2°C | | |
| | Humidity | 90∼95%RH | | |
| | Time | 500+24/-0 hour | | |

| 18. Loading under damp heat | | | | |
|-----------------------------|--|----------------|---|--|
| | MDKK1616 | | Inductance change : Within ±10% No significant abnormality in appearance. | |
| Specified Value | MDKK2020, MDMK2020 | | | |
| | MDKK3030, MDMK3030 | | | |
| | MDMK4040 | | | |
| | MDPK5050 | | | |
| Test Methods and | The test samples shall be soldered to the test board by the reflow. The test samples shall be placed in thermostatic oven set at specified temperature and humidity and applied the rated current continuously as shown in below table. | | | |
| Remarks | Temperature | 60±2°C | | |
| | Humidity | 90∼95%RH | | |
| | Applied current | Rated current | | |
| | Time | 500+24/-0 hour | | |

| 19. Low temperature | e life test | | | |
|-----------------------------|--|----------------|---|--|
| Specified Value | MDKK1616 | | Inductance change : Within ±10% No significant abnormality in appearance. | |
| | MDKK2020, MDMK2020 | | | |
| | MDKK3030, MDMK3030 | | | |
| | MDMK4040 | | | |
| | MDPK5050 | | | |
| Test Methods and Remarks | The test samples shall be soldered to the test board by the reflow. After that, the test samples shall be placed at test conditions as shown in below table. | | | |
| | Temperature | -40±2°C | | |
| | Time | 500+24/-0 hour | | |

| 20. High temperature life test | | | |
|--------------------------------|--------------------|---|--|
| | MDKK1616 | | |
| Specified Value | MDKK2020, MDMK2020 | _ | |
| | MDKK3030, MDMK3030 | | |
| | MDMK4040 | | |
| | MDPK5050 | | |

This catalog contains the typical specification only due to the limitation of space. When you consider the purchase of our products, please check our specification. | 21. Loading at high | temperature life test | | | |
|---------------------|---|----------------|---|--|
| Specified Value | MDKK1616 | | Inductance change : Within ±10% No significant abnormality in appearance. | |
| | MDKK2020, MDMK2020 | | | |
| | MDKK3030, MDMK3030 | | | |
| | MDMK4040 | | | |
| | MDPK5050 | | | |
| Test Methods and | The test samples shall be soldered to the test board by the reflow. The test samples shall be placed in thermostatic oven set at specified temperature and applied the rated current continuously as shown in below table. | | | |
| Remarks | Temperature | 85±2°C | | |
| | Applied current | Rated current | | |
| | Time | 500+24/-0 hour | | |

| 22. Standard cond | ition | |
|-------------------|--------------------|---|
| Specified Value | MDKK1616 | Standard test condition : |
| | MDKK2020, MDMK2020 | Unless otherwise specified, temperature is 20±15°C and 65±20% of relative humidity. |
| | MDKK3030, MDMK3030 | When there is any question concerning measurement result: In order to provide correlation |
| | MDMK4040 | data, the test shall be condition of 20±2°C of temperature, 65±5% relative humidity. |
| | MDPK5050 | Inductance is in accordance with our measured value. |

METAL CORE SMD POWER INDUCTORS (MCOIL™ MD SERIES)

PRECAUTIONS

1. Circuit Design

◆Operating environment

Precautions

1. The products described in this specification are intended for use in general electronic equipment, (office supply equipment, telecommunications systems, measuring equipment, and household equipment). They are not intended for use in mission-critical equipment or systems requiring special quality and high reliability (traffic systems, safety equipment, aerospace systems, nuclear control systems and medical equipment including life-support systems,) where product failure might result in loss of life, injury or damage. For such uses, contact TAIYO YUDEN Sales Department in advance.

2. PCB Design Precautions All Pland pattern design

1. Please refer to a recommended land pattern.

Technical considerations

Land pattern design
 Surface Mounting

- Mounting and soldering conditions should be checked beforehand.
- · Applicable soldering process to this products is reflow soldering only.

3. Considerations for automatic placement

Precautions

- ◆Adjustment of mounting machine
 - 1. Excessive impact load should not be imposed on the products when mounting onto the PC boards.
 - 2. Mounting and soldering conditions should be checked beforehand.

Technical considerations

- Adjustment of mounting machine
 - 1. When installing products, care should be taken not to apply distortion stress as it may deform the products.

4. Soldering

◆Reflow soldering

- 1. Please contact any of our offices for a reflow soldering, and refer to the recommended condition specified.
- 2. The product shall be used reflow soldering only.
- 3. Please do not add any stress to a product until it returns in normal temperature after reflow soldering.

♦Lead free soldering

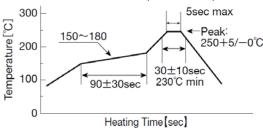

Precautions

- When using products with lead free soldering, we request to use them after confirming adhesion, temperature of resistance to soldering heat, soldering etc sufficiently.
- ◆Recommended conditions for using a soldering iron (NR10050 Type)
 - · Put the soldering iron on the land-pattern.
 - Soldering iron's temperature Below 350°C
 - Duration 3 seconds or less
- · The soldering iron should not directly touch the inductor.

◆Reflow soldering

- If products are used beyond the range of the recommended conditions, heat stresses may deform the products, and consequently degrade the reliability of the products.
 - •NR30/40/50/60/80, NRV20/30, NRH24/30, NRS20/40/50/60/80 Type, NR10050 Type, NS101/125 Type Recommended reflow condition (Pb free solder)

Technical considerations

5. Cleaning

Precautions

◆Cleaning conditions

1. Washing by supersonic waves shall be avoided.

Technical considerations

♦Cleaning conditions

1. If washed by supersonic waves, the products might be broken.

This catalog contains the typical specification only due to the limitation of space. When you consider the purchase of our products, please check our specification. For details of each product (characteristics graph, reliability information, precautions for use, and so on), see our Web site (http://www.ty-top.com/).

6. Handling Precautions

◆Handling

- 1. Keep the product away from all magnets and magnetic objects.
- ◆Breakaway PC boards (splitting along perforations)
- 1. When splitting the PC board after mounting product, care should be taken not to give any stresses of deflection or twisting to the board.
- 2. Board separation should not be done manually, but by using the appropriate devices.
- ◆Mechanical considerations
- 1. Please do not give the product any excessive mechanical shocks.
- 2. Please do not add any shock and power to a product in transportation.
- ◆Pick-up pressure
 - 1. Please do not push to add any pressure to a winding part. Please do not give any shock and push into a ferrite core exposure part.
- ◆Packing
- 1. Please avoid accumulation of a packing box as much as possible.
- **♦**Board mounting
- 1. There shall be no pattern or via between terminals at the bottom of product.
- 2. Components which are located in peripheral of product shall not make contact with surface (top, side) of product.

♦Handling

- 1. There is a case that a characteristic varies with magnetic influence.
- ◆Breakaway PC boards (splitting along perforations)
- 1. The position of the product on PCBs shall be carefully considered to minimize the stress caused from splitting of the PCBs.
- ◆Mechanical considerations
 - 1. There is a case to be damaged by a mechanical shock.
 - 2. There is a case to be broken by the handling in transportation.
- Technical considerations
- ◆Pick-up pressure
 - 1. Damage and a characteristic can vary with an excessive shock or stress.
- ◆Packing
 - 1. If packing boxes are accumulated, that could cause a deformation on packing tapes or a damage on the products.
- ◆Board mounting
 - 1. If there is pattern or via between terminals at the bottom of product, it may cause characteristics change.
- 2. If components which are located in peripheral of product make contact with surface (top, side) of product, it may cause damage or characteristics change.

| 7. Storage condit | ions |
|-------------------|----------|
| | * |
| | |

Precautions

◆Storage

- To maintain the solderability of terminal electrodes and to keep the packing material in good condition, temperature and humidity in the storage area should be controlled.
 - · Recommended conditions

Ambient temperature : −5~40°C

Humidity: Below 70% RH

- The ambient temperature must be kept below 30°C. Even under ideal storage conditions, solderability of products electrodes may decrease as time passes.
 - For this reason, product should be used within 6 months from the time of delivery.
 - In case of storage over 6 months, solderability shall be checked before actual usage.

Technical considerations

♦Storage

1. Under a high temperature and humidity environment, problems such as reduced solderability caused by oxidation of terminal electrodes and deterioration of taping/packaging materials may take place.

This catalog contains the typical specification only due to the limitation of space. When you consider the purchase of our products, please check our specification. For details of each product (characteristics graph, reliability information, precautions for use, and so on), see our Web site (http://www.ty-top.com/).
